

ODU Recwell court Reservation Guide

Team : Sujith Varma Manthena (01244559)

Indu Reddy Donuru (01244411)

Overview:

- This task focuses on the issue of reserving courts in the recreation center for sports—a problem the author has frequently encountered.
- The document highlights the difficulty students face in using sports facilities, such as insufficient courts and the inconvenience of having to reserve them through activity center employees.
- Furthermore, it points out the lack of available equipment, making it hard for students to engage in sports without long waits.
- The existing court reservation system is described as inconvenient, requiring a complicated process involving recreation center staff, leading to potential mistakes and confusion.
- The document suggests that these issues not only cause disappointment but also undermine students' commitment to regular physical activity.

Application Purpose and Domain Background

We're developing an application set to revolutionize the way students interact with recreational sports facilities at their college. At the heart of this innovation is a glaring need: to streamline the reservation process for sports courts, which has been a source of frustration due to limited availability and cumbersome booking procedures.

Scenarios and Personas

Scenario: Imagine a student, eager to play tennis after a week full of lectures, only to find all courts booked and the reservation process confusing and inefficient.

This application aims to eliminate such barriers, ensuring every student has the opportunity to engage in sports without the hassle.

Personas:

The Enthusiast (Vince): Keen on maintaining a healthy lifestyle through sports but discouraged by the current booking system.

The Facilitator (Mike): A staff member who manages court reservations, often overwhelmed by the manual process and seeking a more streamlined approach.

Use Cases

Seamless Court Booking: A feature allowing students to book courts directly through the application, with real-time availability updates.

Equipment Reservation: Alongside court bookings, students can reserve necessary equipment, ensuring they're fully prepared for their activities.

Low-Fidelity Prototype

Our low-fidelity prototype sketches the foundation of a user-friendly interface, including:

Home Screen: Where users start their journey, featuring a login or registration option.

Court and Equipment Booking: A straightforward and intuitive booking system, allowing users to select sports, check court availability, and reserve equipment.

Feedback System: A feature for users to report issues or provide suggestions, ensuring the application evolves according to user needs.

Technical Setup

The application is designed to be deployed using XAMPP, indicating a web-based solution that can be integrated into existing college IT ecosystems seamlessly. The setup instructions provided suggest an initial focus on ease of deployment and accessibility, ensuring that stakeholders can engage with the application with minimal technical barriers.

Startup Instructions

- ❖ For this Application usage please install **XAMPP** <https://sourceforge.net/projects/xampp/>

Step - 1: click on the portfolio link, you will find HCI click on it You will find a pop up as fig.2 click on code. You will be directed to Github page.

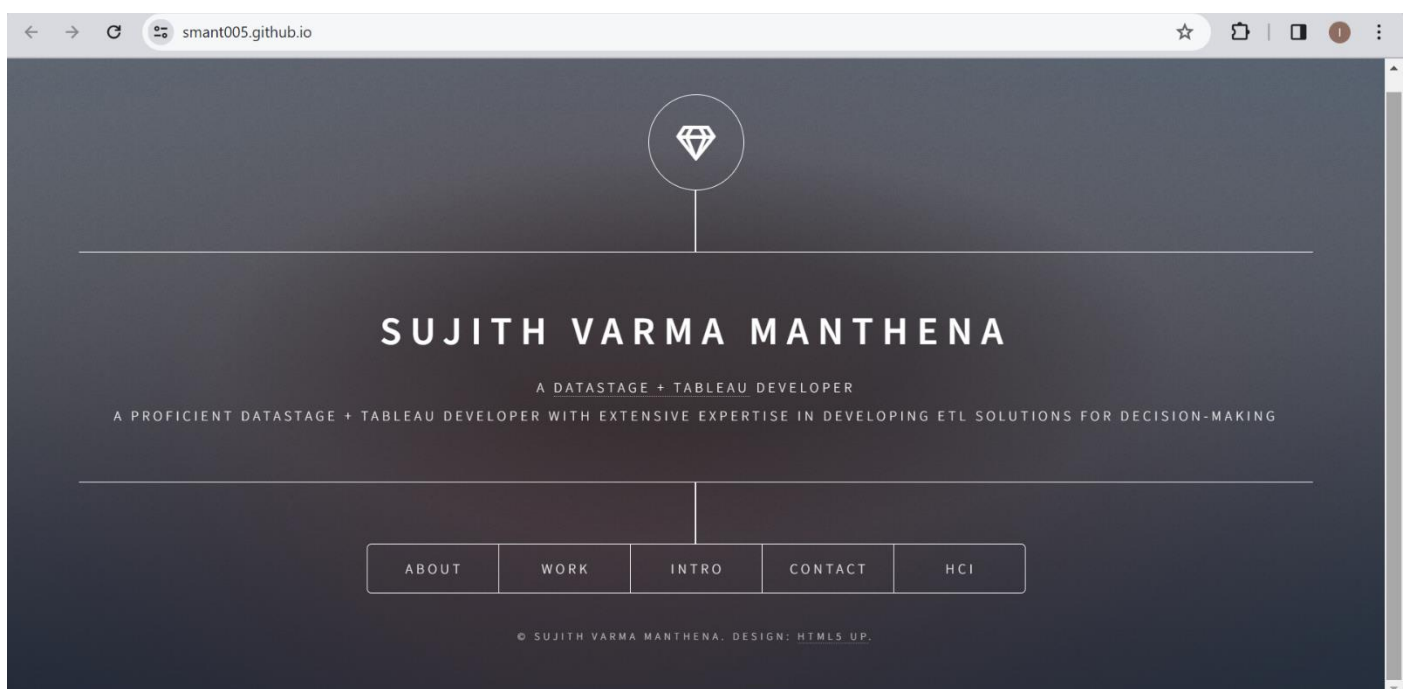

Fig.1

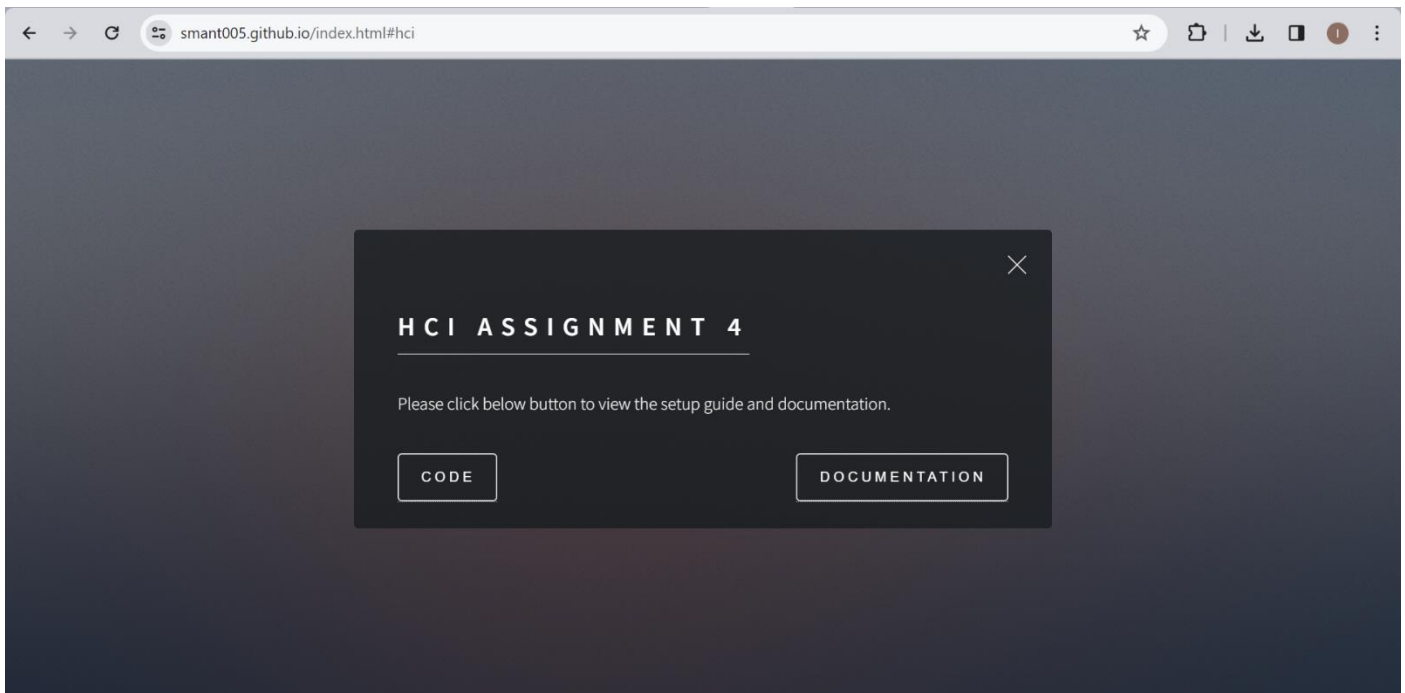

Fig.2

Step - 2: Click on the code button which is green in color, it has a drop down and has a download Zip at the bottom, click on it. HCI-HW-4-main will be downloaded.

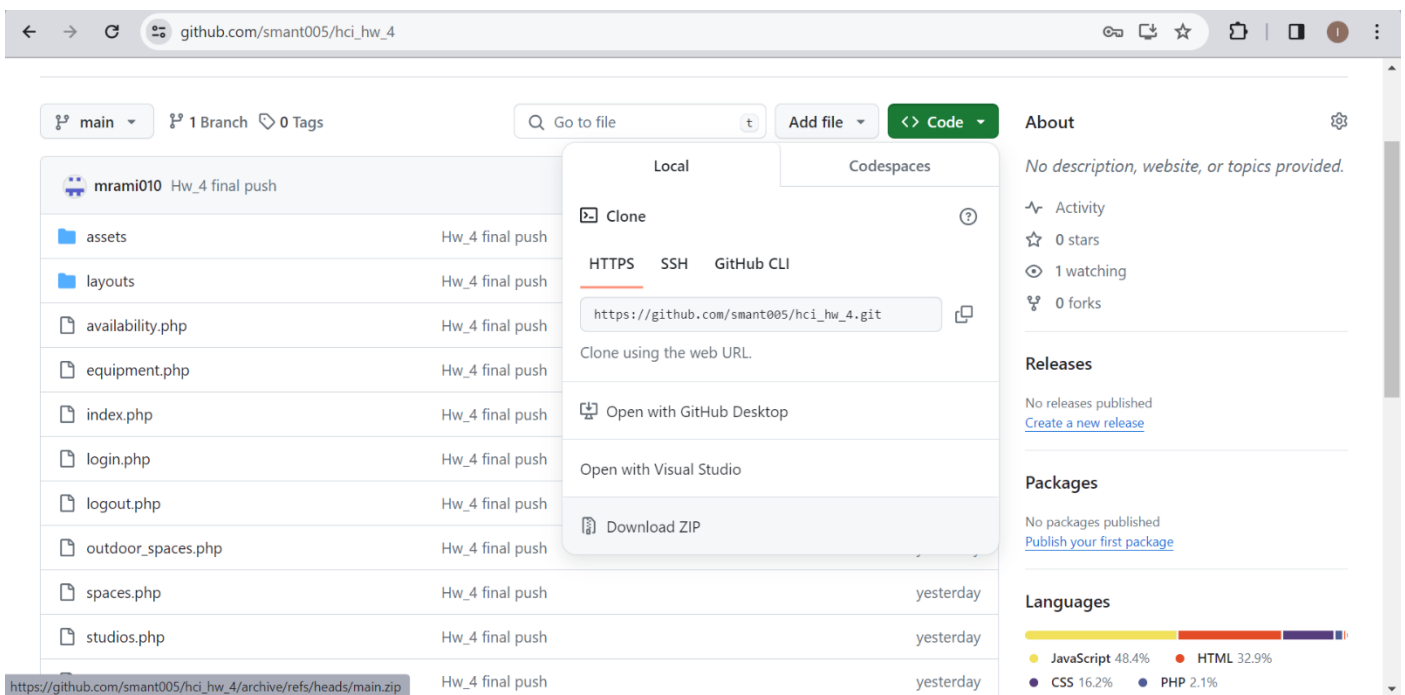

Fig.3

Step - 3: Go to your files and search for **XAMPP htdocs folder**, move HCI-HW-4-main to that file and extract all. Open HCI-HW-4-main file folder you will find **fms** dataset (fig.6)

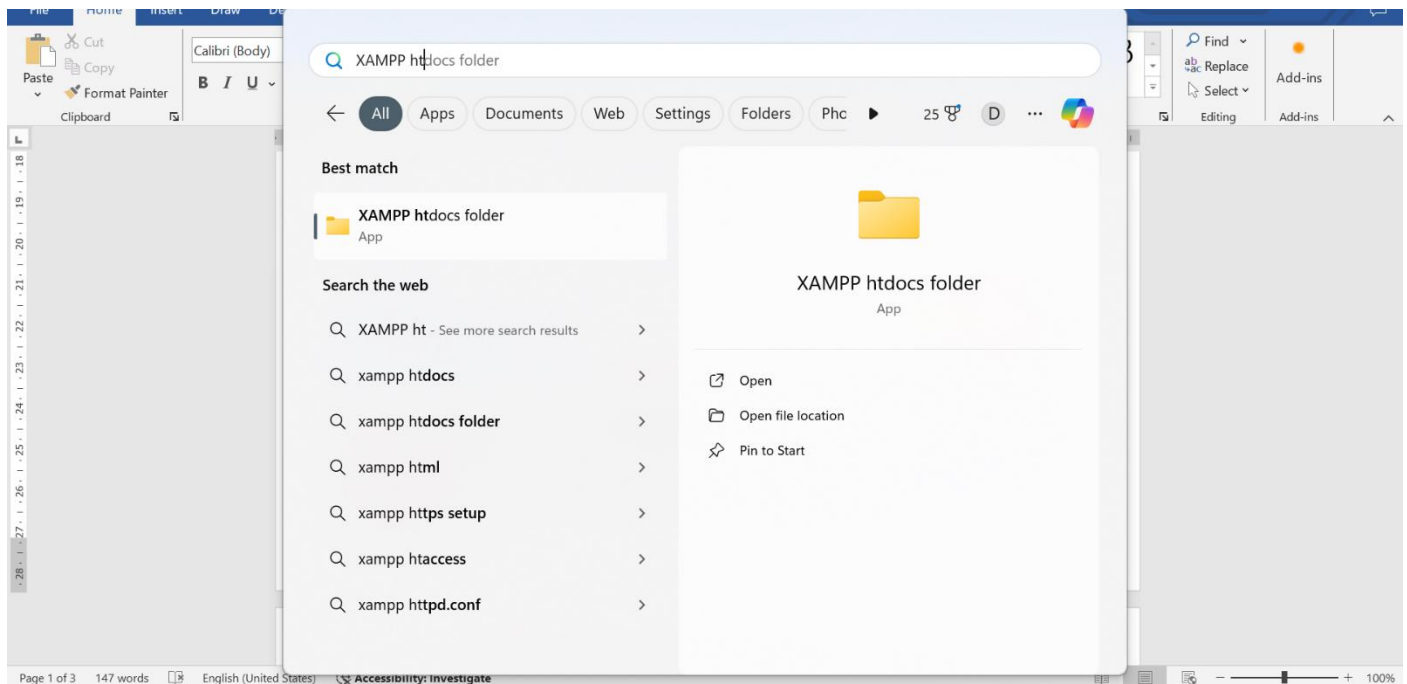

Fig.4

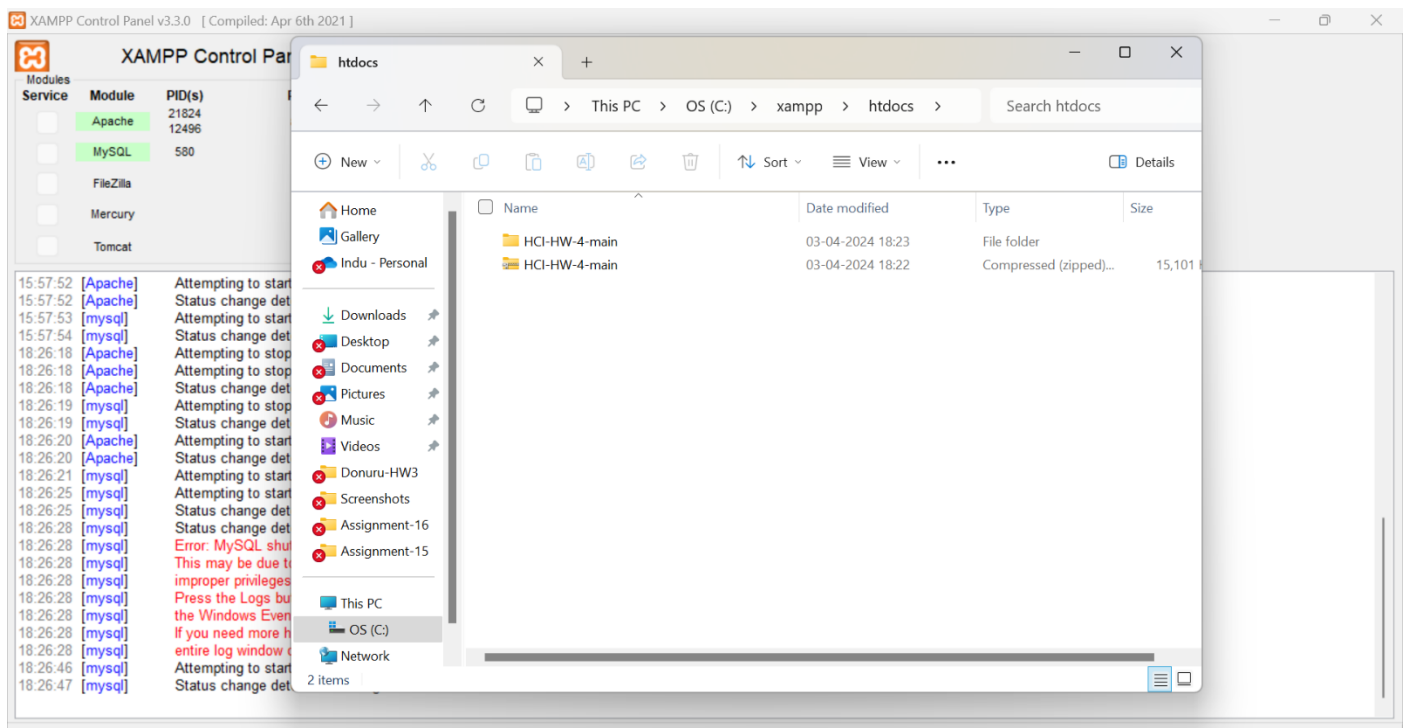

Fig.5

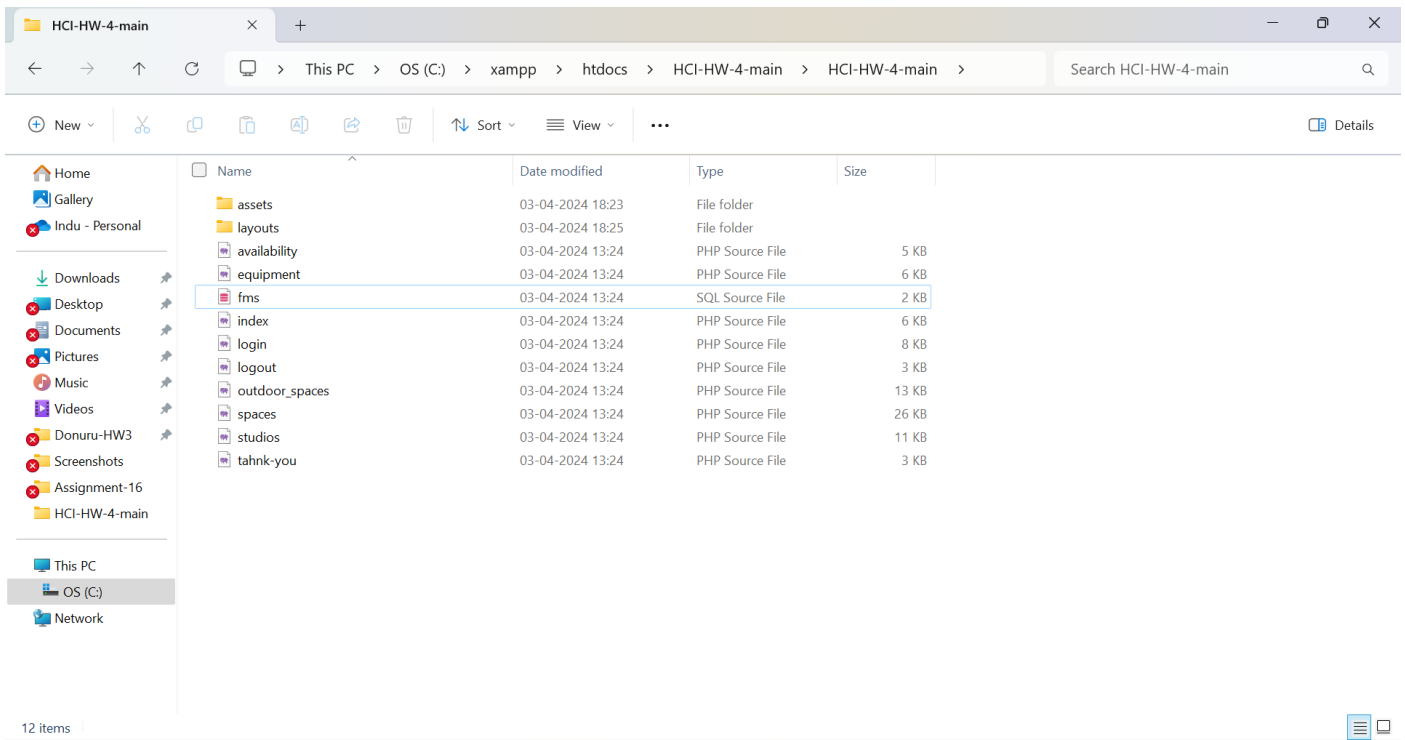

Fig.6

Step - 4: Now open **XAMPP** start Apache and MySQL actions, click on the **MYSQL** admin and create a new database named **fms** and import the fms dataset from file.

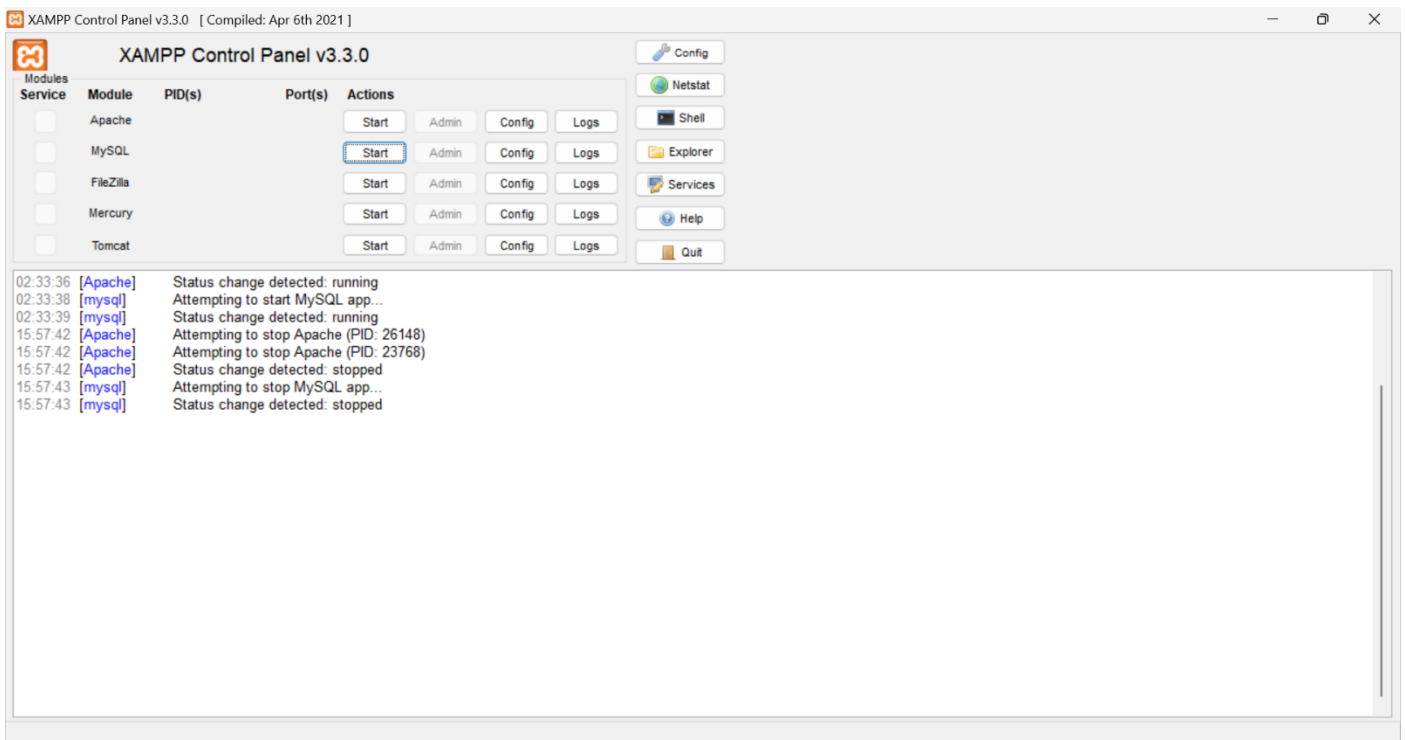

Fig: start action

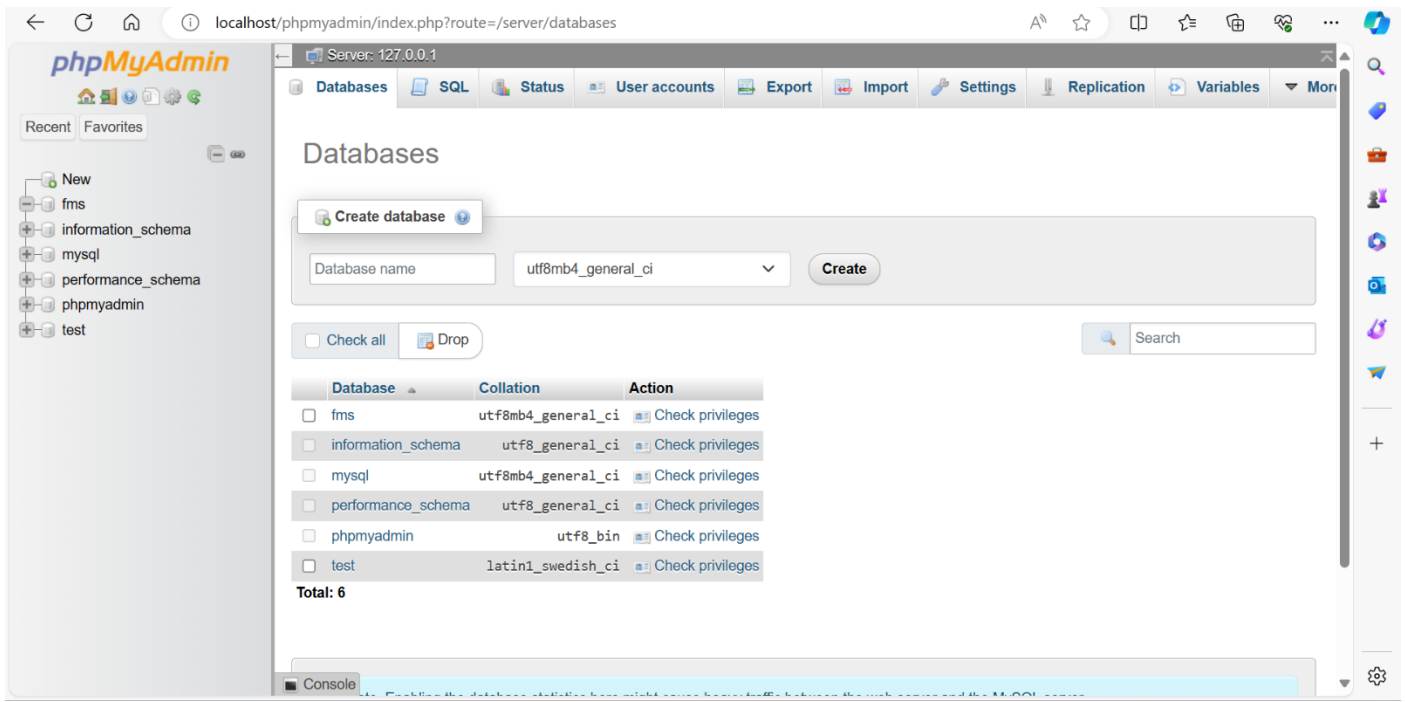

Fig: create dataset

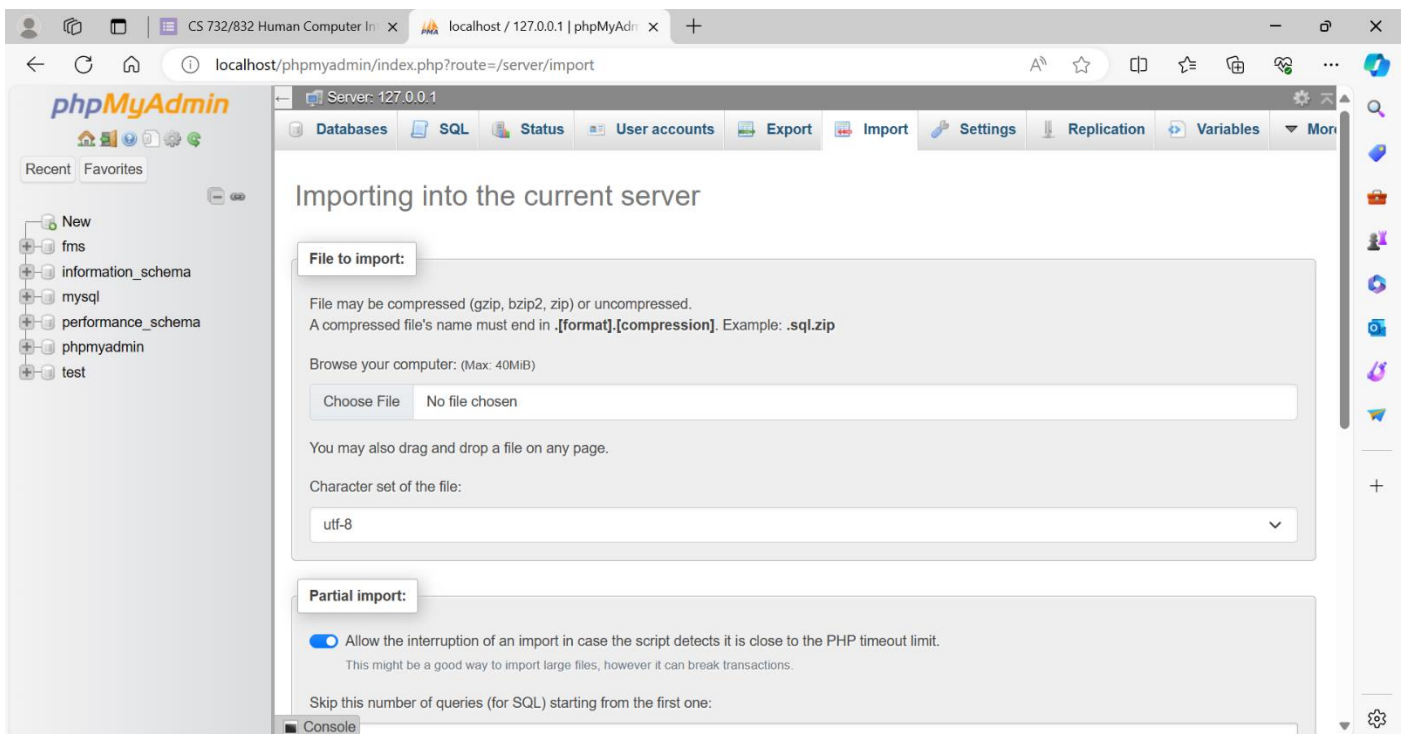

Fig: Import database fms

Step - 5: Go back to the control panel and click on the Apache admin and click the [hci_hw_4-main/](#) in both pages as shown below.

Log In

Below page opens, you can select the sport you want to play and click on Book Now.

Step – 7: Select the time and type of court

The screenshot shows a web application interface for 'OLD DOMINION UNIVERSITY'. The main heading is 'Indoor Sport Spcaeas'. Below this, there are eight court booking cards arranged in a 2x4 grid. Each card displays a sport icon, the court name, location, next available time, and court number. Each card also has 'Book Now' and 'Details' buttons.

Sport	Court Name	Recreation Center	Next Available Time	Court Number
Basketball	Basketball Court	Recreation Center	Next: 04/12/2024, 10 AM - 12 PM	Court 1
Basketball	Basketball Court	Recreation Center	Next: 4/20/24, 2 PM - 4 PM	Court 2
Basketball	Basketball Court	Recreation Center	Next: 9/5/24, 9 AM - 11 AM	Court 3
Badminton	Badminton Court	Recreation Center	Next: 9/5/24, 10 AM - 12 PM	Court 1
Badminton	Badminton Court	Recreation Center	Next: 9/5/24, 10 AM - 12 PM	Court 2
Throw Ball	Throw Ball	Recreation Center	Next: 9/18/24, 10 AM - 12 PM	Court 1
Throw Ball	Throw Ball	Recreation Center	Next: 9/5/24, 10 AM - 12 PM	Court 2
Table Tennis	Table Tennis	Recreation Center	Next: 9/5/24, 10 AM - 12 PM	Court 1

Step – 8: Give your detail and book an appointment and click on reserve. And your appointment is successful.

The screenshot shows a web application interface for 'OLD DOMINION UNIVERSITY'. The main heading is 'Book Appointment'. Below this, there is a form with several input fields and a 'Next' button.

Book Appointment

First Name: Sujith Varma

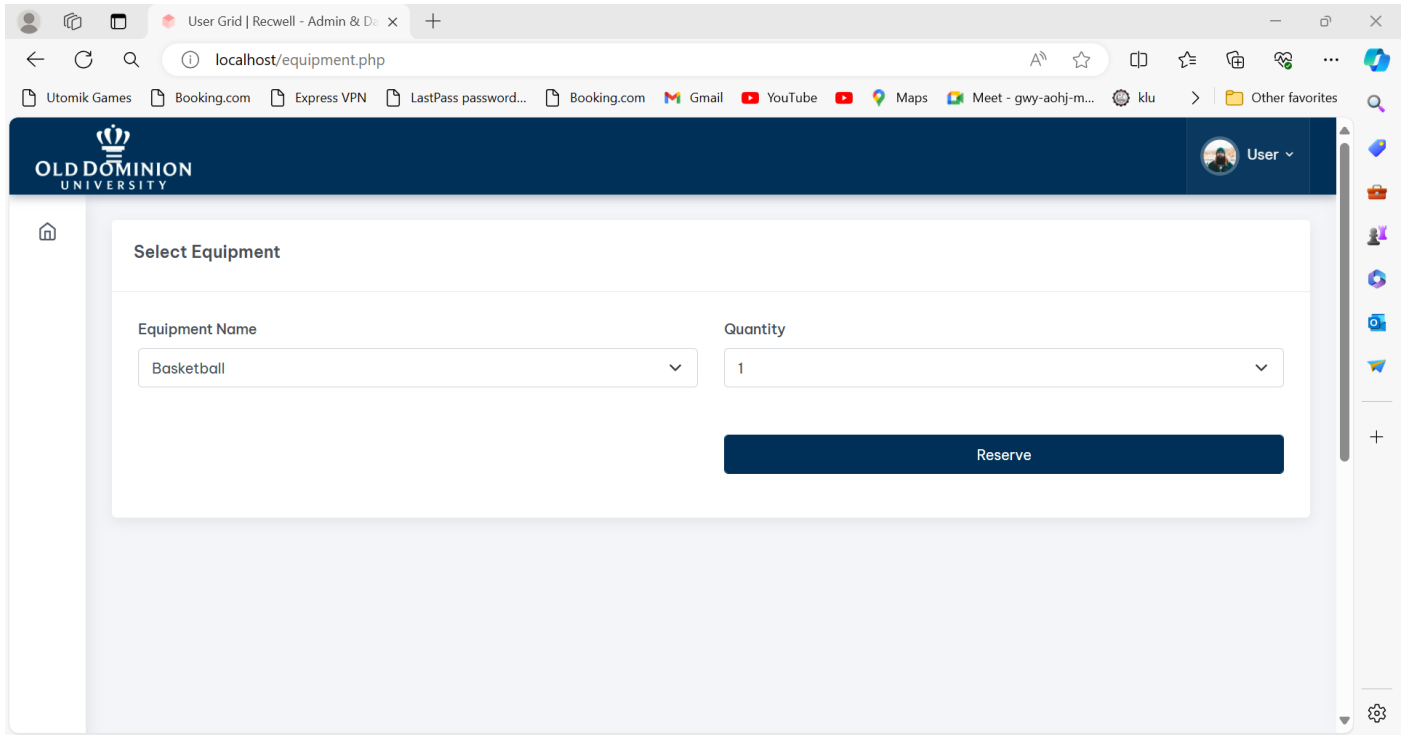

Last Name: Sujith Varma

UIN: 01259337

Start Date and Time: 19-08-2019 13:45

Duration: 60 Mins

Next

Step – 9: You will get a confirmation like the below, and then you are all set.
